

Mathematics in Industry Reports

Hosted on Cambridge Open Engage

What is Mathematics in Industry Reports (MIIR)?

MIIR is a site hosting the reports produced from numerous study groups and workshops with industry that take place around the world. MIIR provides visibility for early stage research in industrially relevant mathematics.

What are the benefits of publishing your study group reports on MIIR?

- All reports are fully searchable and free to access
- Every report is assigned an individual DOI
- Views and downloads metrics calculated
- Indexing on Google Scholar
- Comments section on each report to allow feedback and collaboration

How do I get my report approved for MIIR?

Your study group must have a dedicated space on the site. Once this is confirmed and the organiser of the study group has approved your reports you can register and upload your report for free. There will be a light-touch moderation process.

How can I set up a page for my study group on MIIR?

If you would like to get your study group set up on MIIR, please contact cambridgeopenengage@cambridge.org with the details.

What is Cambridge Open Engage?

Cambridge Open Engage is the early research website from Cambridge University Press. More than a preprint server, it supports interdisciplinary research and collaboration.
